#4 Comparative Anatomy

- **Analogous structures are similar in function but differ in structure**
- Analogous structures **DO NOT** show common ancestry

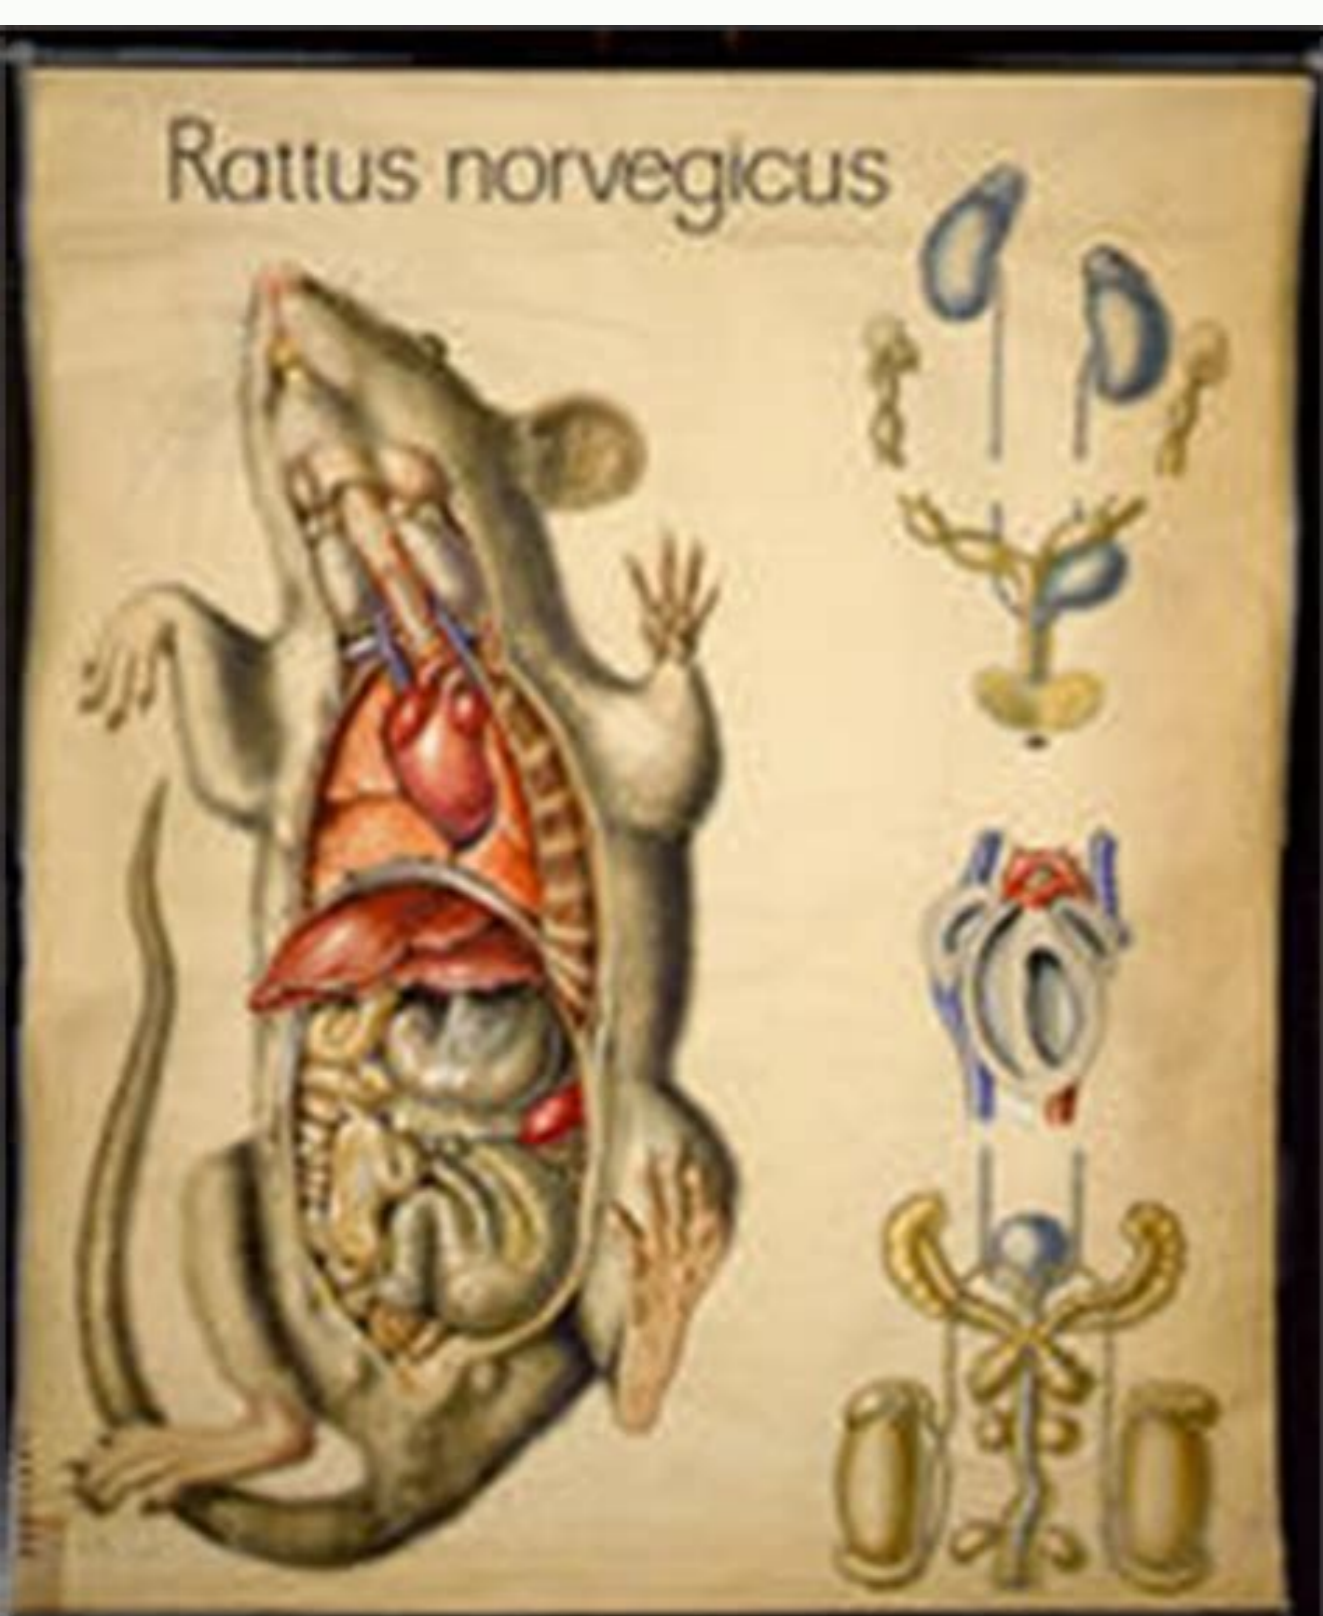

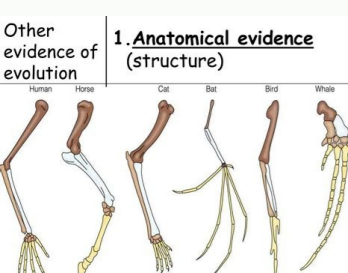

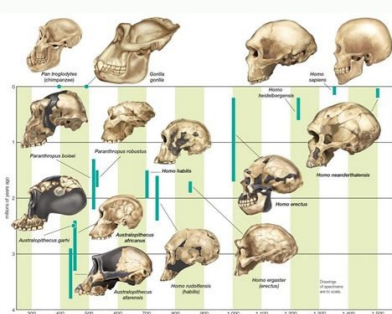

Fly wing

Bat wing

17

Natural Selection	Acquired Characteristics
A Giraffes with longer necks will reach more food. They will survive and reproduce. Their offspring will get these genes.	B A mother dyed her hair red, her child is born with red hair.
C White haired bunnies are unable to survive in the woods. They do not reproduce and fewer and fewer of the bunnies will have white hair.	D A giraffe wants more to eat so she stretches her neck, her child will have a longer neck.
D During the industrial revolution, all of the trees turned black. Black moths survived & reproduced. White moths were more readily eaten.	E A fly wants to suck more blood, so it "decides" to increase it's nose length. Its children will have a longer nose.
Homologous	Analogous
L Airplane wing	I Insect wing
M Bird wing	J Insect eye
N Human eye	K Octopus eye
O Arm hair	Q Hair on leaf
P Cow hoof	R Camel hoof
S Fly leg	T Whale fin
U Tripod leg	V Human skin
W Bricks of a house	X Skin of frog
Y Bat wing	Z Human arm

The fossil was displayed in a museum in Munich, Germany but was destroyed by a bombing raid in 1944 during the World War II. Key Facts & Information History & Taxonomic Details Spinosaurus Meaning The name Spinosaurus (spin-o-saur-us/pronounced SPINE-oh-SORE-us) comes from the Latin word spina meaning thorn and Greek word saurus meaning lizard. Aegyptiacus. It had straight teeth like knives different from curved teeth of other carnivorous dinosaurs. It walked on its back legs since it had short front legs. The Spanish paleontologist Cristiano Dal Sasso found the largest specimen of Spinosaurus in 2005. It was a top predator that has a mouth resemblance with that of a crocodile. According to the film's consulting paleontologist, John Horner, based on spinosaurus size, it is a unique creature, and no other animal is similar to it. Spinosaurus was regarded as an intelligent animal as evident on its brain size to body mass. The fish scales found at its rib cage specimen was evidence that it had a bulk diet of fish. This specimen had well-preserved teeth. Diet Spinosaurus was mainly a carnivore and piscivore. Its teeth were perfect for spearing and holding slippery preys like fish. Future specimens might incomplete still but reported being similar in size. This crocodile-like snout had a tip with tiny holes and pits with nerves on it. He said in his hypothesis, spinosaurus was a predator, unlike, T-rex that was a scavenger. See the fact file below for more information on the Spinosaurus or alternatively, you can download our 25-page Spinosaurus worksheet pack to utilise within the classroom or home environment. These are ready-to-use Spinosaurus worksheets that are perfect for teaching students about the Spinosaurus which means "spine lizard" because the dinosaur has long spines on its back that has a snail or humpback structure. Modern Age Spinosaurus replaced Tyrannosaurus as the main antagonist. Habitat Paleontologists believed that Spinosaurus lived near water and land along with other top predators like Bahariasaurus and Carcharodontosaurus in what is now northern Africa. This type of species was known as S. Description Height and Weight Spinosaurus was considered as one of the biggest carnivorous dinosaurs and believed to be even bigger than Giganotosaurus, Tyrannosaurus, and Carcharodontosaurus. These muscles look like a large hump as that of the camel. Paleontologists studied another specimen in the year 2014 and 2018 based on a more complete specimen. Another noted use of this snail was to attract a mate. The Spinosaurus dinosaurs became Earth inhabitant during the Middle Cretaceous period, around 100 million years ago in North Africa areas. Specimen studied in the year 2005, 2007 and 2008 suggested that it was between 41 feet to 59 feet (12.6 meters-18 meters) in length and 7 tons to 20 tons in weight. Not ready to purchase a subscription? It had a narrow, thin, and long skull with a mouth similar to that of a crocodile.
